VOLUME 31: No. 27

ACME, ALBERTA, THURSDAY, JULY 10th, 1952

\$2.00 a Year; 5c a Copy

Mr. and Mrs. J. Bucknell attended the funeral of the late Ernest Goldhammer.

Mr. Fred Schmierer is a patient in the Belcher hospital, Calgary for a few days.

Miss Vance of Seattle, Wash. is visiting with her father, manager of the Carbon Hotel.

Mr. and Mrs. Terry Wheat and Miss Alba Wheat of Mercoal are visiting at the home of Mr. and Mrs. Jim Bushby.

We understand Mr. Gamble has transferred to Benalto. He is being replaced by Mr. Leo Trepanier as station agent with Leo returning to his home town from Acme.

Obituaries

T. G. CADMAN
Mr. T. G. Cadman, 68, passed away July 9th in the Veterans' hospital, Victoria, B.C.

He had been a resident of Alberta since 1904, farming N.E. of Carbon and was agent for the P. & H. elevator at Sharples. He was a member of the Carbon Old Timers and Carbon Masonic Lodge.

He is survived by his wife, Sarah at Victoria; two sisters, Mrs. M. Isaac of Carbon; Mrs. Guthrie of London, England; and one brother in London, England.

Funeral will be at Victoria.

ERNEST GOLDHAMMER
Death of Ernest Goldhammer 38, occurred suddenly on July 3 at the home of his father 2 miles north of Carbon.

He is survived by his parents; two sisters, Dorothy of Bredenden, Sask. and one sister living in International Falls, U.S.A.; two brothers, Louis in Ontario and Charles of Carbon.

Funeral services were held on Monday, July 7th in the Carbon United Church with Rev. G.B. Hotchkis officiating. Burial followed in the Carbon cemetery.

Pallbearers were: J. Woods, Francis Poxon, T. Dixon, Jack Barber, Jim Barber, A. Barnes;

Mrs. J. Anderson has left on an extended visit to California:

Mr. W. Poole is a patient in the Drumheller hospital.

Mr. and Mrs. Syd Cannings of Munson are visiting at their homes on a week's holiday.

Mrs. S.N. Wright, Jr. had the misfortune to fall Saturday and break her hip. She is at present in the Holy Cross hospital.

Legion Notes

The Legion members and myself wish to thank the few faithful ones who turned out for the Boys Ball Tournament. It is a pity there was such a poor crowd as the boys deserve better support as they turned out a good brand of ball for them. We must do something to help them along to make better citizens and what is better than good fellowship and sportsmanship. So help them in future with your support.

Newcastle won from Acme in the first game. Beiseker beat Carbon in an extra inning game and Newcastle defeated Beiseker in the final game.

The next Legion meeting is on July 21 at 8 p.m. sharp so plan now to attend.

Don't forget the Saturday night bingo games.

Thanks again to the members and others who helped us get the diamond ready and also helped during the tournament.

Chas. Cave, President.

Returned To Rolling Hills

Buffalo Are Attraction At Waterton Lakes National Park

WATERTON LAKES, Alta.—Buffalo days have returned to the rolling hills of southern Alberta. But today's herd is a far cry from that of its forefathers which grazed here more than a century ago. Under supervision of federal park wardens, six of these mighty monarchs of the plains migrated via truck from Elk Island Park, 25 miles east of Edmonton. They were placed in a "fish-bowl" paddock just west of the highway near the Pincher Creek entrance to Waterton Lakes National Park.

The paddock, two adjoining pastures, one for winter and one for summer, is situated on the historic site of the old Hudson Bay fur brigade trail which ran from Winnipeg over the south Kootenay pass to Vancouver. Parts of this trail are still evident in the buffalo paddock area.

The herd, recently enlarged to seven when a calf was born, will be kept reasonably small, about 12 head, because it is essentially a show herd.

The Waterton Lakes herd is descended from the famed Pablo herd of the flathead country in Montana. This herd was purchased by the Canadian government in 1906.

The Pablo herd, started in 1873 by Walking Coyote, a Pend d'Oreille Indian, remained on the range until 1906 when the Canadian government obtained an option on it delivered at the railway station at Ravalli, Mont. Transfer of the herd, 709 in number, to Canadian pastures took three years.

At the time of the purchase buffalo in Canada numbered only 20. Of the Pablo herd, 620 head were placed in a 200-square-mile enclosure at Wainwright, Alta., and the remainder at Elk Island park.

The buffalo increased so rapidly that it was necessary to limit the number at Wainwright to 8,000. In

order to dispose of the surplus, some of the younger animals were transported to Wood Buffalo Park, a range of 10,000 square miles in northern Alberta.

The buffalo lived for nearly 40 years at Wainwright but an outbreak of bovine tuberculosis forced another transfer. This time the herd was moved down the Athabasca river in scows to the Fort Smith area in the Northwest Territories, where it has remained.

In 1938 it was estimated there were 18,000 buffalo in Canada. Now the estimates are between 16,000 and 18,000.

Funny and Otherwise

Henpeck, safely out of his wife's hearing, was letting himself go. To a friend who complained of some domestic difficulty, he said, grandly: "My dear boy, we never have trouble of that sort in our house. If I say a thing is to be done, I insist upon it being done."

"And is it?"

"Of course," replied Henpeck, "er—even if I have to do it myself."

The telephone operator answered an agitated summons from a call box. "Oh, miss," came a fearful feminine voice, "can I have my ten cents back? Albert won't speak to me."

An actress came off the stage after a successful first night, and was surprised when the manager handed her a bunch of flowers and a packet of marigold seeds.

"The flowers are from a gentleman in the stalls, and the seeds from a Scotsman in the gallery," was his explanation.

Goon: "Why are you sawing that wood so fast? You're knocking yourself out, Lefty."

Moron: "I know, but I want to get it all cut up before the saw gets dull."

The salesman scattered a can of talcum over the rug, and then said: "Lady, if this marvelous vacuum doesn't pick up every particle, I'll eat it."

"Start eating," said the husky farmwife. "We haven't got electricity."

To get back on your feet, skip a car payment.

Mrs. Smith was reading a letter at breakfast. Suddenly she looked up suspiciously at her husband. "George," she said, "I've just received a letter from Mother saying she isn't accepting our invitation to come and stay, as we do not appear to want her. I told you to write and say she was to come at her own convenience. You did write?"

"Er—yes," said George, "but I couldn't spell 'convenience,' so I made it 'risk'."

—Central Press Canadian.
GETS MILITARY MEDAL—Cpl. Kenneth V. McOrmond, Royal Canadian Regiment, has been awarded the Military Medal for bravery in action in Korea. His citation credited him with quick thinking and courage displayed while leading a patrol to wipe out an enemy machine-gun nest. Detected by Communist gunners, Cpl. McOrmond returned their fire then led his patrol safely back to his own lines. He is now on leave at his Sudbury, Ont., home.

Morden Publisher Re-Elected To Head Manitoba Weeklies

WINNIPEG.—Ray S. Evans, editor and publisher of the Morden Times, was re-elected president of the Manitoba division, Canadian Weekly Newspapers association.

Two other officers were also re-elected at the final business session of the association's two-day convention at the Fort Garry hotel. They were F. R. Manning, of the Reston Recorder, first vice-president, and A. H. Leech, St. Vital Lance, second vice-president.

Past-president is N. S. McLean of the Elmwood Herald.

Mr. McLean paid tribute to A. W. Hanks, president of the national association, who is retiring as managing treasurer of the Manitoba division after 14 years service. Mr. McLean presented Mr. Hanks with a leather briefcase on behalf of Manitoba members.

Suggests Battleford As Centre For Sask. 50th Anniversary

BATTLEFORD, Sask. — The historic town of Battleford has been suggested as one of the chief centres for official observances when Saskatchewan celebrates her 50th anniversary in 1955. Town Councillor Joe Kuffner has launched a movement to have Battleford, a capital of the Northwest Territories when they included Saskatchewan and Alberta, play an important role in the province's golden jubilee celebrations.

As early as 1800 the Hudson's Bay company established posts at the junction of the Battle and North Saskatchewan rivers in west-central Saskatchewan about 75 miles northwest of Saskatoon.

The Royal Northwest Mounted Police established their regional headquarters at Battleford and it was from that fort that R.N.W.M.P. went to quell the disturbance at Duck Lake after the Riel rebellion broke out in 1885.

After a defeat at Duck Lake and being besieged at Fort Pitt, the Mounties withdrew to Battleford. As the fortunes of battle changed they received the surrender of Poundmaker of the Stoney Indians at Battleford.

It was in Battleford that the Saskatchewan Herald, the first newspaper west of Winnipeg, was published in 1878. The town also boasts the oldest Roman Catholic and Anglican churches in the province.

Battleford people take their town's history casually and the town of North Battleford has become the commercial centre of the area but Councillor Kuffner feels that the town's colorful part in the province's history deserves recognition.

ONE WAY TO REDUCE

REGINA.—It isn't only the politicians who lose weight during an election campaign. Regina Returning Officer Calvin Martin climbed on a scales after the provincial election and found he had dropped 15 pounds in six weeks.

Today is yesterday's pupil.

SELECTED

Recipe

FISH PIE

2 tablespoons butter or Blue Bonnet Margarine
2 tablespoons flour
1 cup milk
1½ cups flaked cooked fish
1 tablespoon finely-chopped onion
1½ tablespoons finely-chopped parsley
1 tablespoon drained capers or chopped green pickle
2 tablespoons lemon juice
Salt
Pepper
1 batch Cheese-Biscuit Pie Topping
Preheat oven to 450 deg. (hot). Grease a small casserole. Melt butter or margarine and blend in flour; slowly stir in milk. Cook, stirring constantly, until sauce is smoothly thickened. Stir in prepared fish, onion, parsley, capers or chopped pickle and lemon juice; season to taste with salt and pepper. Turn into prepared casserole. Place mixture in preheated oven while preparing topping. Prepare pie topping; put over filling and bake pie as directed in topping recipe.
Yield: 4 or 5 servings.

Helps You Overcome FALSE TEETH Looseness and Worry

No longer be annoyed or feel ill-at-ease because of loose, wobbly false teeth. FASTEETH, an improved alkaline (non-acid) powder, sprinkled on your plate holds them firmer so they feel more comfortable. Soothing and cooling to gums made sore by excessive acid mouth. Avoid embarrassment caused by loose plates. Get FASTEETH today at any drug store.

My MAGIC pastry rates cheers!

MAGIC CHICKEN TURNOVERS

Combine and chill 1½ c. finely-diced cooked chicken, ½ c. medium-thick white sauce. Mix and sift into bowl, 2 c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tsp. Magic Baking Powder, ½ tsp. salt, 1 tbs. granulated sugar. Cut in finely, 3 tbs. shortening. Mix 1 beaten egg and ½ c. milk. Make a well in dry ingredients, pour in liquid and mix lightly with a fork. Roll dough out to ⅛" thickness; cut into 4" squares. Place about 2 tbs. chicken mixture on each square, near corner. Fold dough over diagonally, making triangles. Seal edges by pressing with fork tines; prick tops. Bake on greased pan in hot oven, 450°, 15 min. or until golden brown.

Rise of Great Lakes Water Level Is Puzzle to U.S. Canadian Experts

Hungry waters of Lake Erie eat away land, threaten this Cleveland residential area.

By JOHN F. SEMBOWER
(CPC Correspondent)

CHICAGO. — The Great Lakes, world's largest inland waterway system, is overflowing and everyone in Canada and the U.S. is baffled over what to do about it.

Meanwhile, a billion dollars' worth of damage threatens over a wide area from one of the strangest floods in history—a "slow flood" associated with lakes rather than rivers, but nonetheless destructive to the property of millions along the lengthy shoreline bordering 96,000 square miles of water.

The United States Army Engineers have been holding hearings on the extent of the losses in prospect. In this city and its suburbs, whole beaches and parks have been wiped out, and streets and apartment houses undermined. On the rural shores, houses are being undermined, and are on the verge of tumbling into the waters.

Similar reports pour in from Buffalo, Cleveland and other points on Lake Erie; communities on Lake Huron, the entire Lake Superior area, and from virtually every town on Michigan's shores. On the Canadian shores, communities have asked government assistance, so far have received none.

So grim is the outlook that not even Lloyds of London, the fabulous insurance house which prides itself on underwriting almost anything, will quote on wave insurance which once was a standard form of coverage in the Great Lakes region.

By July the level of Lakes Michigan and Huron will be 583.8 feet above the mean tide at New York, and the highest since records were started 97 years ago.

Both lakes rose an additional three and a half inches during April. An immediate cause is believed to be last year's unusually cool summer, which retarded normal evaporation loss, and heavier-than-usual rainfall in the huge 300,000 square mile draining system.

However, no one can be sure, because fluctuations in the level of the lakes have mystified scientists for generations. Although they are not affected by tides, there seems to be a hookup between their capacity and solar radiation, causing 21-year cycles in the level.

Unusually full periods were recorded in 1862, 1886, 1907, 1929, and now.

A prolonged cloudy period could have considerable effect, since it is estimated that evaporation takes from 20 to 28 inches of water from the lakes each year.

There may be longer range forces at work, however, because geologists long have considered the lakes one of their most intriguing problems. Born during the withdrawal of the huge glaciers, the lakes originally were much more depressed than now by the weight of the great ice sheets.

For thousands of years, the earth's crust has been springing back under its lightened load, so that former shorelines now sometimes are high bluffs. An extinct lake bed larger than all five Great Lakes put together has been found west of Lake Superior with Lake Winnipeg as a remnant. Scandinavia and Siberia had similar vast post-glacial lakes.

Could the lake basin be rising slightly so that the water overflows? If this is so, man-made efforts to confine the water within present boundaries seem puny indeed. All Canada, with residents of the north shore of Lake Ontario suffering great damage, nevertheless hopes that the St. Lawrence Waterway might help.

One U.S. proposal is that Chicago's drainage canal, which taps Lake Michigan for water that eventually flows down the Mississippi in a river bed whose flow actually was reversed, should be permitted to drain off its maximum possible flow.

The United States supreme court rule limited the drainage in 1939 when cities around Lake Michigan feared that it would be emptied. However, this now offers small comfort, since engineers calculate that even the full flow of 10,000 cubic feet a second would reduce the level

only an inch and a half the first year and four inches in five years, not enough to counterbalance the present rate of rise.

It is an ill wind that blows nobody good, however, and the lake shipping is booming as a result of the deeper water. The average iron ore boats can carry an additional 90 tons of cargo per trip with every increase of one inch in the draft.

With 498 ships of Canadian and U.S. registry operating on the lakes, a conservative estimate places the additional iron ore which will be delivered to the big steel mills this year at 1,080,000 tons.

GEMS OF THOUGHT

HOME

Pure humanity, friendship, home, the interchange of love, bring to earth a fortate of heaven. They unite terrestrial and celestial joys, and crown them with blessings infinite.—Mary Baker Eddy.

This is the true nature of home—it is the place of Peace; the shelter not only from all injury, but from all terror, doubt, and division.—Ruskin.

Where we love is home, Home that our feet may leave, but not our hearts.

—Oliver Wendell Holmes.

It is indeed at home that every man must be known by those who would make a just estimate either of his virtue or felicity; for smiles and embroidery are alike occasional, and the mind is often dressed for show in painted honor and fictitious benevolence.—Samuel Johnson.

Sask. Scientists Have Made Great Strides In Insect Research

SASKATOON. — Saskatchewan scientists have made great strides in the study of insect movements by labelling them with radioactive tracers, and then checking them with a geiger counter. The systems developed to tag wireworms, cutworms and black flies were used for the first time by the Saskatchewan research men. The projects have been carried out by the dominion entomological laboratory in Saskatoon in co-operation with the University of Saskatchewan.

This field of insect research is in its infancy and as new techniques are perfected, endless research possibilities are uncovered.

Dr. A. P. Arnason, in charge of the entomological phase of the research, said the significance of tagging underground insects with a radioactive particle is that underground insect behavior now can be observed under practically normal circumstances.

Research workers found it was impossible to place the radioactive particle inside the body of the wireworm without killing it. It was found, though, that the particle could be cemented to the last segment of the worm's body without disturbing it too much.

In the meantime, movements of the worms between shedding of the skin are being observed.

The studies show that the worm doesn't know where he is going. Direction of movement was hap-

azard, and the individuals appeared to have no way of locating food other than by striking it in their random movements through the soil. It is possible for them to pass within half an inch of a food deposit without finding it.

Dr. Arnason said it was found that worms prefer a moderately moist soil and a temperature of about 75 degrees. As the topsoil dried out they moved to a lower depth. Worms commonly died before being able to find their way out of soil heated to more than 90 degrees.

Cutworms, considered larger than wireworms, can survive having the particle of radioactive material injected inside the body cavity.

To study the dispersal of black flies and mosquitoes, the insects are tagged in the early stages of development by raising them in a radioactive solution for a short time and then returning them to their natural habitat.

A few hundred thousand individuals were tagged but few were located later. It was concluded that millions of insects would have to be tagged before indications of dispersal movements could be found.

On The Side : By E. V. Durling

Which is the diamond wedding anniversary, the 60th or the 75th? That is the subject of a current argument. What difference does it make? They are both ridiculous for a diamond wedding. Of what good are diamonds to an 80-year-old woman? She should have them when she's young. Do you know what the third anniversary is? It's the leather wedding. So if you know some people celebrating their third anniversary give the husband a belt and the bride a handbag. The sixth anniversary is the iron wedding. I am slightly baffled as to gift suggestions for that. Still, I guess you could give the husband a set of golf irons and the wife an electric iron. The 12th is the nylon wedding. No problem there on what to give the wife, but what can a husband use in nylon? The 13th is the lace wedding. That's easy for the wife angle. Give her some of that attire Gussie Moran made famous. As for the husband, the lace wedding seems to completely shut out the old boy.

A Roman Said It First

Again I see Wilton Lackaye credited with the remark: "An onion can make people cry, but there never has been a vegetable invented to make them laugh." This remark originated with the Roman Epigrammatist Martial, nearly 2,000 years ago. . . . A British sow named Gertrude recently gave birth to 20 piglets. That was clever of her. But why name a sow Gertrude? Seems the girls named Gertrude who complain about the careless way their name is used really have a case.

Post Office Cupid

In Venezuela the post-office handles love letters at half price. They must be enclosed in a red envelope. A highly romantic idea. Suppose the post-office in Canada introduced that system. It certainly would add considerable interest to the arrival of the mail at summer resorts. The feminine guests would hardly be able to control their anxiety to see which of the girls received the most mail in red envelopes.

Never a Tomato

An expert on the subject of reincarnation recently stated that a human being will always be a human being in future cycles. Never "a dog, horse, cockroach or a tomato." So if you believe in reincarnation and are worrying about the possibility of being a tomato in your next cycle you can now forget all about it.

Silver Wedding Party

Are you nearing your 25th wedding anniversary? Know anybody who is? I have an idea for a silver wedding party. First, let it be a costume party. All guests to come attired in the style of 1927. Transport them to the party in a 1927 automobile. I am certain you can rent one somewhere. Dance the dances of 1927 to the tunes of that year. Some of the songs popular 25 years ago were "Side by Side", "Red Lips Kiss My Blues Away", "After I Say I'm Sorry" and "Charmaine".

Call of Romance

Women who marry a second time seldom marry for love. They just want to marry a nice man who will provide them with a peaceful home and a sense of security. Most men, however, who embark on a second matrimonial venture do so for love. The male is, of course, the most romantic sex.

PATROL VESSEL, MINESWEEPER TO JOIN CANADIAN NAVY—The 5,400-ton Arctic patrol vessel, (top), now nearing completion in the yards of Marine Industries Ltd. at Sorel, Que., for the Royal Canadian navy, will be named H.M.C.S. Labrador by Mrs. Louis St. Laurent, wife of the prime minister. A feature of the new icebreaker is a landing deck capable of handling two helicopters. The coastal minesweeper, (above), will be christened H.M.C.S. Chignecto at Sorel, Que., on the same day by Mrs. Brooke Claxton, wife of the minister of national defence. The little ship has wooden hull planking on aluminum alloy framing, and the superstructure is also of aluminum alloy.—Central Press Canadian.

DRAWBRIDGE SOLVES SENTRY'S PROBLEM—Necessity being the mother of invention, watchmen attached to this Kojima Island prison camp guard tower rig up a device that defies the barbed wire entanglements of the compounds. It's a sort of drawbridge which can span the fences protecting the tower.—Central Press Canadian.

ANGLO-GERMAN UNITY SHOWN BY ANTHONY EDEN VISIT—Indicative of the new arrangement of Europe's political and military forces, British Foreign Secretary Anthony Eden reviews a police guard of West Berlin. The police are fully equipped to handle invasions of Communists from the East sector.—Central Press Canadian.

ON THE MOVE—A Korean civilian, among those ordered to move from POW areas on Kojima Island, carries his most prized possession—a good-sized pig—in an "A" frame strapped to his back. In the background is another Korean citizen with boxes of her possessions stacked high on her head.

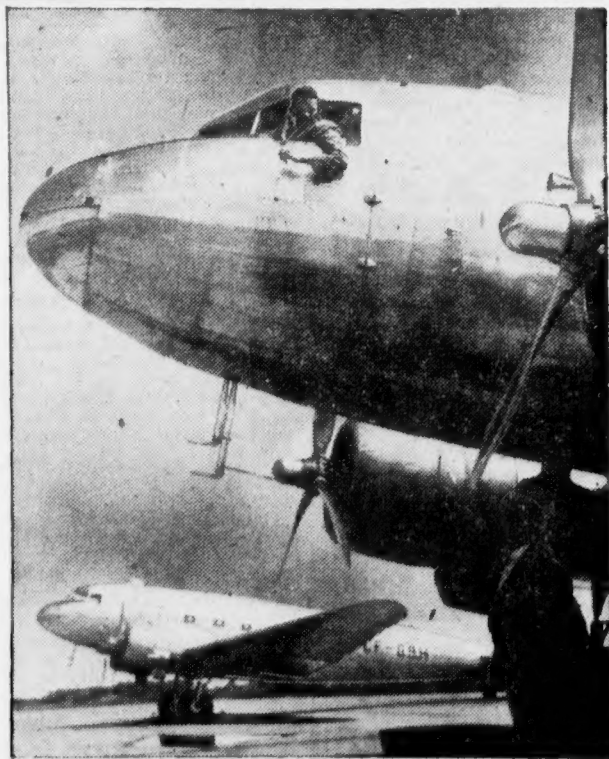

EAST GERMANS ARMED BY REDS—Members of the German Communist Youth organization are shown marching with their rifles at a Leipzig youth rally, which coincides with reports from East Germany that plans for compulsory arming of the male population from 18 to 60 and of the female population from 18 to 45 are now being put into effect. The boys and girls shown here are reported training under supervision of the East German people's police—a force which the Western Powers says is the nucleus of a German Communist army.—Central Press Canadian.

HON. LESTER B. PEARSON, Minister of External Affairs, recently received an honorary degree of Doctor of Laws at Columbia University's 198th commencement exercises. The photo above shows him arriving at the University.

2991

CANADA'S GREATEST AIRLIFT—in which one American and two Montreal pilots combined to bring seven Dakota aircraft from Cairo to Montreal for the R.C.A.F.—was successfully completed as the last entry was made in the log book recording the marathon flights. The air lift was a necessity because there is at present a world-wide shortage of transport aircraft. And when the R.C.A.F. needed seven transports for its Northwest Command, based at Edmonton, a Montreal firm had to go all the way to Cairo to fill the order. Completing the order meant more than just flying the planes, not built for long-distance travel, a distance of 7,500 miles. The Dakotas were picked up at a time when Egypt was torn by internal warfare, and the men bringing about the aerial transfer wondered, on several occasions, whether or not they would get back to Canada alive.

FIRST AID

First Aid is just what the two words imply, namely the earliest possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given at once, at the scene of the accident or sudden illness and before a doctor is available to assume responsibility.

SPECIAL WOUNDS

Wounds of the Abdomen

Wounds of the abdomen are always serious. A kick, a blow or a crush may cause no open wound of the skin but may rupture the liver or other solid organ causing severe internal bleeding, or the stomach or intestine causing peritonitis. There is immediate and severe shock.

First Aid—Treat for shock. Watch for signs of concealed haemorrhage. Recovery may be prompt in a few minutes as the blows may not have done serious damage and the shock may be due only to a blow in the solar plexus. If recovery is not prompt call the doctor or arrange to transport the victim to the hospital. Do not give the victim anything to drink.

Stabs, Bullet Wounds, Goring by Animal

If intestine is exposed or protruding do not attempt to replace it. Fold a clean towel; wring it out of clean warm water; place it over the intestine and wound and apply a binder. Transport the victim to the hospital. Do not disturb the dressing.

Dog Bites

First Aid—Wash thoroughly with warm water and soap and encourage bleeding. Apply a dressing. Send the victim at once to a doctor, who will notify the Department of Public Health.

Identify the dog and notify the police. The danger is that of rabies which is a rare disease in Canada, but fatal if there is delay in starting protective treatment. The dog should not be killed but placed in confinement under observation. If the dog is "mad" (rabies) it will die in a few days and examination by experts will reveal the presence of the disease in the brain.

World Happenings Briefly Told

Queen Elizabeth received a sarong from the Sultan of North Borneo. The Sultan who was visiting Britain brought along the sarong, made especially for the Queen by Borneo women.

At an exhibition in London showing advancements in banking technique in the last 100 years it was stated only one manual operation is left to the bank clerk—sorting out cheques for return to different branches. The inventors are working on this now.

Under a new trade agreement initiated by Norwegian and Soviet negotiations in Oslo, Norway will deliver salt herring, hardened fat and aluminum to the Soviet Union in exchange for wheat, rye and manganese ore.

An Ottawa school principal and father of five children told a senate committee that if the trend towards comic books and illustrated magazines continues, school texts may have to be printed as comics to hold the attention of students.

stop the return flow of venous blood but without stopping the blood going to the limb. The limb below the tourniquet should thus become dusky.

4. With a sharp clean knife make a small criss-cross cut through the whole thickness of the skin and over each and every fang mark but avoiding a visible vein.

5. Apply suction to the wounds to get free oozing of bloodstained fluid. Apply this suction at first by your own mouth. This is tiring but not harmful to you.

Send for a suction cup if possible. If no doctor is available stop the suction after two hours. Apply a sterile dressing, but do not remove the tourniquet. Arrange transportation to a doctor or a hospital.

General Care: Treat as for shock. Give water, tea, coffee, hot soup, but no alcohol.

Snake bite in children is more serious as their little bodies have received a relatively larger dose of the venom.

The word "turnpike" springs from the pikes used as gates on early toll roads.

Water Safety Hints For You

With the swimming season already started or just about ready to begin, the important point of "water safety" arises. Here are a few points which will help you avoid dangerous accidents in and around the water. If you and your friends take this information to heart, remember it well and above all, practice it at all times, you will be making one of the smartest plays you'll ever make!

Always remember this—the best way to save yourself from water accidents is to avoid doing the things that cause these accidents.

1. Never let your pals or dare you into trying to swim farther or dive from a greater height than you are used to.

2. Always make sure you swim where people can see or hear you. Then, if you do get into trouble, there will be someone around to help you out.

3. No matter how strong a swimmer you are, you should never go for a long swim, unless you are accompanied by someone in a boat who is capable of pulling you to safety, if you get into trouble.

4. Never dive into water that you don't know all about. Go in without diving and sink feet first to make your investigation.

5. Take a tip and swim along the shore. Don't go out into deep water and then turn to come back. It's just as much fun and it's a hundred per cent safer to swim along the shore!

6. Never laugh, and avoid chewing gum when in deep water—you may swallow some water accidentally and start to choke.

7. If you like boating, learn to swim first. Never go out alone in a small boat if you can't swim. If children or non-swimmers are in the boat make sure you take along life preservers.

8. If you can't swim, don't play in water out of your depth, even when using water wings or inner tubes, etc.

9. Make sure you go into the water slowly, taking a complete ducking or two before you do any swimming.

10. If you want to change seats in a boat pull into shore and change there.

11. Obey the signs posted at your swimming pool or beach.

12. Start off the season slowly and get into condition before you attempt any long or fast swims.

14. And finally, remember this, you are your brother's keeper. Yes, the fact remains that we all have a definite responsibility to other people. So, whenever you are swimming or are near the water, try to keep alert.

Don't Jump At First Base

Jumping at first base is one of the most common mistakes made by young ball players in running to first base. This only slows you up. Running right on to the bag with a final hard drive into one last, explosive stride will get you there more quickly. So take a tip and increase your batting average by running through first base instead of jumping at it.

Membership in Sports College, the national public service organization designed to help raise the standards of physical fitness and sports efficiency in Canada, is free. Anyone can join, including girls, and young women and we have divisions for all ages—we also have a special division for coaches, managers and other such leaders and officials. To join send a letter to: Sports College, Box 99, Toronto 1, Ontario.

ANSWER: Five. One in New Mexico, one each at Nagasaki and Hiroshima, and two at Bikini.

PRISCILLA'S POP—That Final Bite

—By Al Vermeer

Large Stone Home Is Little Bit Of Old England At Moosomin, Sask.

MOOSOMIN, Sask.—"The Maples" of Moosomin stands solid and enduring. A handsome, 10-roomed natural stone house in wide wooded grounds, the mansion is a little bit of old England. The Victorian flavor of the big stone house starts with the riding crop in the hallway, carried past the steeplechase pictures and into the den where the squire smokes his pipe and a visitor examines a Malayan kris on the library wall.

The squire of Maples is 82-year-old Kenneth Price, London-born and Oxford-nurtured, who began life as the son of an imperial army officer. He changed his mind about an army career and in 1887 turned his back on the white cliffs of Dover—but not its traditions—to become a farmer at Cannington Manor, Sask.

After his home at Cannington burned down he worked in a livery stable at Moosomin and part of his job was driving the mail and passenger coaches over the old Moose Mountain trail to Birtle, Man. His parents, sisters and brothers came out in 1889 and they settled on a farm near here.

The restless Price however was a timber cruiser in northern Manitoba when the First World War broke out, and he became Captain Price with a squadron of the 9th Canadian Mounted Rifles that served overseas. He was gassed in France and after months of hospital care found his way back to Moosomin, where he served as postmaster for the next 30 years.

Mr. Price has been astride a horse most of his 82 years. He staged his own fox hunts in the Moosomin district with hounds imported from England. Polo was another pastime he brought to the prairie west but jumping was his favorite sport.

He took five horses to Winnipeg one year and won every steeplechase prize offered. Mr. Price has been a top-notch cricket player, representing Saskatchewan in other parts of Canada.

He was the first secretary of the Martin municipality and president of the Dominion Postmasters' Association for a five-year term. He retired from the Moosomin post office in 1950.

Squire Price now is holding the fort for merrie England at Moosomin and confidently looks forward to celebrating his first century at his beloved Maples.

Alberta Meeting Half Of Canada's Daily Oil Needs

Alberta oil production continues to break all previous records and is now close to 200,000 barrels daily, which is about half the oil this country uses in a day.

Daily average for the week ended May 26 was a new peak at 196,013 bbls. compared with 195,172 bbls. the previous record established in the week ended May 19.

Redwater again has the largest production—89,568 bbls. against 88,728 bbls. the previous week. Leduc production rose from 62,471 to 62,721 bbls. daily.

Frank McMahon president of Pacific Petroleum advances some reasons in his 1951 report why he expects the western oil boom to continue to expand.

"The . . . 135 gas and oil discoveries made during the past 16 months in Western Canada give abundant proof of the possibilities for successful development. Under the stimulus of one long distance oil pipeline sharply expanding its capacity, one major oil pipeline under construction, and the authorization of natural gas export by the Alberta Government—the three projects involving almost \$300 million—there is every reason to believe that exploration, drilling and production rates will continue their rapid expansion."—The Financial Post.

Helpful Hints

The drawing of threads in hem-stitching will be easier if they are first gone over with a wet brush that has been rubbed over a bar of soap.

To keep the corners of small rugs from curling, cut pieces of cardboard in the shape of an L. Sew one of these with an overcast stitch to each corner of the rug.

To remove an egg stain, scrape away as much of the stain as possible with a blunt knife. Then sponge with cold water. Never use hot water. Heat makes egg stains harder to remove.

Smile Of The Week

INDIFFERENCE

Brown: "The horn on your car must be broken."

Smith: "No, it's just indifferent."

Brown: "Indifferent! What do you mean?"

Smith: "It just doesn't give a hoot."

Some 30,000 new words came into the English language as a result of World War II. It will depend upon the extent to which they are used whether or not they will remain in the language permanently. 2991

WATER SAFETY HINTS

Small boats can and do upset. The occupants usually jump clear and away from the boat. Should these individuals be non-swimmers or weak swimmers, handicapped by their clothing, then they are most likely to drown. Some persons in such a predicament would cling to the boat as it upset and hold on to it until rescued. Quite often swimmers will foolishly leave the boat in an effort to reach shore. Observing the simple rule of "Stay with the Boat" is a wise move and will save lives. The Red Cross will send free "Hang On" transfers to any boat owner. Other safety rules are — Do not overload the boat — One passenger to a seat — Non-swimmers stay on shore or wear a life jacket — There is always room for common sense.

Quick Canadian Quiz

1. In what cities are Canada's basic steel mills located?
2. In 1950 the CBC cost \$2,405,000; what did Ottawa spend on it in 1951?
3. In 1939 the federal government collected from Canadians a total of \$535 million. What is Ottawa's estimate for the current year?
4. In 1913 Canada received 400,870 immigrants. How many in 1951?
5. Which industry consumes more of our forests annually—lumber or pulp and paper?

Mayor Finds He's Wearing Someone Else's Topcoat

A patron at a Lethbridge theatre found his topcoat missing from the checkroom after the show. Unclaimed was one of similar design, in the pocket of which was a coupon from an Edmonton street photographer who had snapped the wearer's picture. Douglas Hackleford, theatre manager, sent off 35 cents for the picture. When it arrived, he had no difficulty identifying it. He hurried to the office of Mayor L. S. Turcotte, who was surprised to find he'd been wearing another chap's coat for a week.

The tusks of an elephant are extensions of the upper incisor teeth.

ODDITIES In The News

Two women whose maiden names were Shirley Weagle—unrelated and never met before—gave birth to sons at the same hospital at Worcester, Mass., six minutes apart.

When a girl bites a dog catcher, that's news. Ellie C. Glover, 26, testified in court at Medford Lakes, N.J., that he was bitten on the left arm by Lucy Fay, a high school junior. The girl admitted she bit him when he tried to take her dog away from her.

Cab driver Bennis Chietero of New York smiled when the man and woman signalled him to pick them up. Chietero recognized them as the pair who only a few minutes earlier had held up a Bronx liquor store. He purposely made a wrong turn and delivered them to a police station.

George Cheeseman of Oshawa is puzzled by his two-tone tulips. One has five petals instead of the normal six and halfway down the stem is another petal, part green and part red. Another plant has five normal petals and one green-and-red petal.

Troy Musser, of Milton, Pa., a long-time Milton barber and sportsman, claims this fish story is the honest-to-gosh truth: Musser was trying his luck in a nearby Northumberland County creek when a gust of wind lifted his hat off his head and carried it to the other side of the creek. Minutes later he spied the hat moving downstream at a rapid, zig-zagging pace. Investigating, he found a 10-inch trout hooked on to one of the flies stuck in the battered fedora. It was his only catch of the day.

A rooster owned by Charlie Ducks-worth, of Summerland, Miss., evicted a setting hen from her nest, hatched out, 12 chicks, and proceeded to scratch worms for the offspring.

Canadian Fashion

(Women's Wear Bureau Photo) Helen Watter's grey worsted shortie has a white pique collar. This wonderful Canadian-made coat comes in the loose box style, princess or the popular shortie shown above.

ANSWERS TO QUICK QUIZ

ANSWERS: 5. Lumber, about 39 per cent. of total cut. 3. Slightly more than four and a quarter billion dollars. 1. Sydney, N.S., Hamilton and Sault Ste. Marie, Ont. 4. 194,000, the highest total since 1913. 2. \$8,318,000.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

::: APPETIZING RECIPES :::

Here's a pretty-as-a-picture dessert for delicious summer eating! It's a feathery sponge cake ring filled with juicy strawberries, and gaily decorated with whipped cream.

STRAWBERRY SPONGE CAKE

One cup, plus 2 tbsp. sifted fine cake flour, 5 egg yolks (at room temperature), 1 cup sifted sugar, 1½ tsp. grated lemon rind, 1½ tsp. lemon juice, 2 tbsp. water, 5 egg whites (at room temperature), ¼ tsp. salt, ¼ tsp. cream of tartar.

Sift flour once, measure, and sift four times. Beat egg yolks in small bowl, adding ½ cup sugar gradually, beating constantly with rotary egg beater. Combine lemon rind, lemon juice, and water and add to egg mixture gradually, beating constantly until very thick and light. Add flour all at once and fold in until just blended.

Beat egg whites and salt with flat whisk or rotary egg beater until foamy. Then add cream of tartar and beat until stiff enough to hold up in peaks, but not dry. Add remaining ½ cup sugar, about 2 tablespoons at a time, beating well with whisk or beater. Fold in egg yolk mixture.

Turn into ungreased round 9-inch tube pan. Bake in moderate oven (375 degrees F.), 30 minutes, or until done. Remove from oven and invert pan 1 hour, or until cold.

To serve, fill centre with slightly sweetened sliced strawberries. Cut cake in wedges and serve with berries and whipped cream.

VIRGIL

By Len Kleis

OUR COMPLETE SHORT STORY—

SMART DOG

—By—

Walter Stanley Shatto

Plan of Old Joe Was Too
Smart for the Young Robber

ALL day the new highway was alive with traffic, but at night it was almost still. Old Joe Simpson—leaned contentedly back in his chair outside his gas station. Joe kept open just the same. He sort of enjoyed it, he said. He'd smoke his pipe and watch the stars. His collie dog would sleep at his feet, and the sheriff's cat would come to visit him from across the road.

A roadster slid up to the pump and interrupted his reverie. Joe walked leisurely over. A slim young fellow hopped out quickly.

"How many?" asked Joe in his soft voice.

The young man jerked out a pistol. "This is a stick-up, granddad," he snapped. "Get inside. And keep quiet."

Joe shook his head sadly. "You fellows are gettin' awful thick. You're the fourth this summer. I wish you'd put that gun away. It's dangerous. And I ain't."

The younger man took a menacing step. "Get in and open the safe." "There ain't no safe. There's a cash register."

"Open it up."

Old Joe Simpson shrugged and pressed a key on the register. "Ain't so much in it, son," he said apologetically, disclosing a handful of change. "I send it out as soon as I get it."

"Baloney! I been watchin' this place since sundown. You done a lot of business a while back, and you ain't been out."

Joe Simpson smiled. "The dog takes it out," he said calmly. "I'll show you."

He whistled. The collie trotted in. "Watch this, son," Joe said. He rolled up a slip of plain white paper and put it into the dog's mouth.

"Take it to Jim, Don," he ordered. The collie disappeared into the darkness outside.

"Where does he take it?"

"Down the road apiece. To my brother-in-law's house."

The young man's eyes narrowed. He picked up a piece of ignition wire. "Put out your hands, granddad. I'm going to tie you up and get that money."

"No," warned Joe softly. "I wouldn't do that. My brother-in-law's the sheriff around these parts. You might get hurt."

At the sound of the word sheriff, the young man whirled around to face the door, gun ready.

"That's all right, son," said Joe. "Jim don't come over in the night time. Not unless I phone him."

"You're kiddin' me. The money's hid right here."

"Look around, son, if you want."

While the young man was rummaging, the collie came back and put his muzzle in the old man's hand. Joe stroked his head. "Smart dog!" he said. Then together they watched the search. Old Joe was smiling faintly, and it looked as if the dog was, too.

At last, with a curse, the young man put his gun in his pocket, and started back to the car. Joe followed close behind.

"No hard feelin's, son," he said. "We all got our trades, I guess."

The young man stopped abruptly. "Put 'em up!" commanded a deep voice.

In the shadow of the car was standing a stocky, powerful man. A silver badge shone brightly on his vest. He jabbed an old-fashioned six-shooter into the young man's ribs. The robber raised his hands.

"Pretty good, Joe," he chuckled. "That's four of 'em this summer."

Old Joe smiled and patted the collie's head. "Yep," he said. "We got 'em all. Me an' my dog. Gimme that paper, Jim."

The sheriff handed over the white slip that the collie had carried.

Old Joe looked at the young man regretfully. "You need a long vacation, son. You ain't smart enough for the stick-up trade."

He unrolled the paper. "See!" he said softly. "Nothin' on it at all. But that means for Jim to hurry right over."

THE TILLERS

—By Les Carroll

Had Large Sores
On Leg and Foot--
Has Healed Nicely Thanks To
Moone's Emerald Oil

"My boy is 16 years old," writes Mrs. C. C. W., Nashville, Tennessee. "Lost 3 weeks from school—sores were so painful. After 4 months and trying most everything, we used MOONE'S EMERALD OIL and after a few applications they healed rapidly. And now his leg has healed nicely, thanks to Emerald Oil."

Thousands of bottles are sold every year to relieve just such cases of stubborn skin itching, irritation and soreness. Stainless—greaseless—MOONE'S EMERALD OIL is highly concentrated and a small bottle lasts a long time. At drug stores everywhere.

OH, HAPPY DAY!—Happy is the day when a soldier gets his pay, but happier is the day when he gets an increase. Serg. Ed. Farrar's ear-to-ear grin tells the joy of thousands of U.S. servicemen who recently received a pay increase, which, because it was passed by U.S. congress months ago, contained back pay amounting to \$200.—Central Press Canadian.

Mine Town
Becoming Model
Of Cleanliness

NATAL, B.C.—Sparwood, two miles west of here in the picturesque Crow's Nest Pass area, doesn't look like a coal-mining town.

It is, in fact, the realization of a dream long held by planners of the Crow's Nest Pass Coal Company.

For years housewives whose husbands worked at the mines put up with the grime and soot from coke ovens and slag piles at nearby Natal and Michel.

But in Sparwood, housewives can forget the coal mines. They live in clean, comfortable bungalows in a well-planned residential town which the coal company hopes will soon replace grimy Natal and Michel entirely.

The project started in 1939 when the company built six houses with a limited expansion in mind. But after the war they decided to broaden the plan and today there are 50 houses in Sparwood with another 25 going up this year.

Lots in Sparwood are sold to company employees for \$1 each. Others must pay \$250 for a lot.

Space has been set aside for a commercial district, well away from the residential area, which includes a large playground for children.

Work will start late this summer on a new \$425,000 high school. In addition to six classrooms, the school will contain a home economics room, industrial arts shop, drafting room, library and study hall, science room, lunch room and a combination gymnasium and auditorium.

The school will be finished in September, 1953. By that time the town of Sparwood will be well on the way to being one of the brightest mining towns in Western Canada.

The pendulum was first used to measure the human pulse.

Fine Cut
Makes a better cigarette

: Western Briefs :

Troops Warned

CHURCHILL, Man. — American forces here have been warned by their officers against unauthorized shooting of birds and other game. The warning came after investigation of reported wanton slaying of ducks, swans, geese and other birds and at least one white fox.

\$325,000 To Repair Bridge

REGINA. — Restoration of the \$900,000 bridge at Saskatchewan Landing, damaged by ice floes last April will cost about \$325,000.

Same Accident Rate

WINNIPEG. — Industrial, home and general accidents claimed the lives of 107 in Manitoba during the first five months of 1952, exactly the same number as in the corresponding period last year.

Picturesque Rock

VANCOUVER. — Experts here say one type of agate rocks found in Vancouver has lines and color resembling oil paintings. After they

are found the stones are ground and polished, and "results can be amazingly beautiful," said Peter Drummond, member of a university group.

He's Independent

VANCOUVER. — Grow your own tobacco is the advice of John Kovacs to smokers who want to beat the rising cost of cigarettes. He is one of a dozen Fraser Valley farmers growing tobacco. But Kovacs himself doesn't smoke.

Where Are the Ducks?

CHURCHILL, Man. — Early hunters returning from trips up the Churchill river have expressed disappointment. They report that so far they have seen plenty of wild swans but few ducks.

Every Help

MEDICINE HAT, Alta. — A baby-sitter and nursing service is provided here for parents attending morning service at a local church. Baby carriages may be wheeled right into the nursery from one church entrance.

Baking's Easier, Speedier
with Wonderful New Fast Rising Dry Yeast!

CINNAMON BUNS

Measure into large bowl, 1 c. lukewarm water, 2 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Fast Rising Dry Yeast. Let stand 10 min. THEN stir well. Scald 1 c. milk and stir in 1/2 c. granulated sugar, 1/4 tps. salt, 6 tbs. shortening; cool to lukewarm. Add to yeast mixture and stir in 2 well-beaten eggs. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl; brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. While dough is rising, combine 1/2 c. brown sugar (lightly pressed down), 3 tps. ground cinnamon, 1 c. washed and dried seedless raisins. Punch down dough and divide into 2 equal portions; form into smooth balls. Roll each piece into an oblong 1/4" thick and 16" long; loosen dough. Brush with melted butter or margarine. Sprinkle with raisin mixture. Beginning at a long edge, roll up each piece loosely, like a jelly roll. Cut into 1" slices. Place just touching each other, a cut-side up, in greased 7" round layer-cake pans (or other shallow pans). Grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, 20-25 minutes. Serve hot, or reheated.

● No more taking chances with perishable yeast cakes that have lost their leavening power! New Fleischmann's Fast DRY Yeast keeps full strength and active right till the moment you use it. Needs NO refrigeration — keeps safely in your cupboard. Try its marvellous results in your next baking.

Alberta Farmers Borrow Plenty Through FILA

Canadian farmers borrowed \$85,000,000 in 1951 under the Farm Improvement Loans Act according to the Annual Report tabled in Parliament by Hon. D. C. Abbott. This was an increase of nearly \$22,000,000 over 1950. More than 75,000 farmers availed themselves of the facilities of the Act in 1951.

In 1951 71% of the loans were made in the three prairie provinces. Loans obtained for the purchase of farm machinery and farm trucks amounted to \$78,000,000 and covered the purchase of \$137,000,000 worth of equipment. This represents 92% of the total money borrowed for all purposes. In Alberta last year 29,399 farmers borrowed under the Act the sum of \$23,240,815.

your vacation in the CANADIAN ROCKIES

Enjoy a mile-high vacation in the sunny Canadian Rockies... with golf, swimming, riding or just relaxing. Beautiful Banff, lovely Lake Louise are within easy reach by comfortable Canadian Pacific coaches, economical roomettes and deluxe sleeping cars.

West Coast & Alaska

Extend your trip to the blue waters of the Pacific Coast. See Vancouver and Victoria... then cruise to romantic Alaska along a coastline of majestic beauty in a luxurious Princess liner. See your Canadian Pacific ticket agent for full details... today!

Level Land

Mr. and Mrs. Henry Stern and Rhoda, Mr. and Mrs. Leonard Lang and family, Mr. and Mrs. Benny Weich, Mr. and Mrs. Alton Suelzle and John Leiske were Banff visitors.

Mr. and Mrs. Emil Berreth have returned home from Walla Walla, Washington.

Dr. and Mrs. S.W. Leiske and Evelyn of Lodi, Calif. were visiting with his cousins, the Leiskes in this district and left Sunday to visit with his parents and brothers in the Lacombe district.

Mr. and Mrs. Emil Gramms were in Calgary over the week-end visiting their mother.

BORN—To Mr. and Mrs. Jas. Suelzle, a daughter. Both mother and daughter doing fine in General hospital.

Mr. and Mrs. C.C. Reimche of Lodi, Calif. are visitors here. Mrs. Reimche is a step-sister of Mrs. Suelzle of this district.

Mr. and Mrs. Theodore Suelzle and family of Calgary were visiting with their relatives and at the S.D.A. Church. Mr. Suelzle, a former resident here, is a contractor in Calgary.

Mr. and Mrs. Marvin Dick were in Calgary on the 28 visiting Mrs. James Suelzle.

Mother Gramms, who was staying with her son, Mr. Emil Gramms, for the past year, has been moved to the Barclay Home in Calgary.

Mrs. Joe Stern is a patient in the Lacombe hospital and had a goiter operation. We are all hoping that Mrs. Stern will be well and able to come home soon.

Miss Frances Bader of Canadian Union College is visiting at the home of Mr. and Mrs. John Leiske. She came home with Marjorie when Mr. Leiske got her from school last Thursday.

Financial Trend

Whether the mildly deflationary trends in evidence since the middle of last year represent a victory over inflationary trends or merely a truce of brief duration is an open question, says the Bank of Montreal's current Business Review. Nevertheless, the B of M states that the recent lifting of credit controls in both Canada and the United States may presumably be taken to reflect "a considered official view that the recurrence of an up-thrust of prices is not a likely near-term development."

A "clearly marked change in trend" occurred in the early months of 1951, the review comments. Consumer credit in the U.S. ceased to expand, and, in Canada, showed an absolute reduction after the first quarter of 1951. Bank loans in both countries levelled off decidedly in the last year. "To what extent this change of trend reflected the effect of the restrictions themselves and how far it was the result of a desire by both borrowers and lenders to avoid over-extended positions will never be determined."

"There was undoubtedly a sharp reaction after March, 1951 in both countries to the consumer buying spree of the previous nine months that had been motivated by fear of shortages."

30XXX30

Mr. and Mrs. Edwin Becker and family of Placerville, Calif. are visiting in this district with relatives and friends. They are former residents here.

Mr. and Mrs. Benny Roth of 22 Hollywood, Valajo, Calif. were visiting in this district last week. Benny is a former Level Land resident and attended school here. He is employed in the Navy Yard in California.

Christa Sell of Sidney, B.C. returned last week to this district to attend the wedding of her brother and sister. Christa is a member of the S.D.A. Medical Cadet Corps and looked very distinguished in her uniform. She is employed at the Haven of Rest in Sidney.

OUTDOOR BANQUET

The meal eaten out of doors on a hike often tastes better than an elaborate spread in the dining room. Tasty sandwiches of cheese or peanut butter, or hardboiled or devilled eggs, with a raw vegetable, are tasty, nourishing and not too bulky to carry. Fresh or dried fruit, too, should be included. For a drink, a vacuum bottle filled with hot or cold beverage will be safer than depending upon water taken from some natural source which may be polluted.

SLEEP BAIT

No animal, including man, can live for more than a very limited time without sleep. It has been found that lack of food can be endured longer than lack of sleep, yet many people find it difficult to induce sleep at night. There is usually some special method discovered through experimentation that will help. Some people find a warm or hot bath at night is effective, while others prefer a warm drink, a short walk before retiring, a light snack or reading a book. Even counting imaginary sheep is said to help. Good ventilation in the bedroom, exclusion of light, and warm but light bedclothes are also helpful.

WHITTLING DOWN THE LBS.

Overweight people, particularly if they are over forty, are much more susceptible to some diseases than are those who are normal or even a little underweight. However, the person who carries around an excess caryo of flesh should never try an intensive reducing campaign except under a physician's care. In many cases a physical ailment may be the cause of the extra weight and this should receive proper treatment first.

SWALLOWING SUNSHINE

Every child needs vitamin D, the sunshine vitamin, if he is to have strong bones and teeth. A deficiency of this vitamin may cause rickets and dental troubles but the lack can be made up by taking the vitamin in tablet, capsule or liquid form. Expectant mothers, too, need vitamin D.

CHRISTIAN SCIENCE

The importance of self-examination will be emphasized in the Lesson-Sermon at Christian Science churches Sunday. The subject is "Sacrament" and it will embody this counsel from "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "We should examine ourselves and learn what is the affection and purpose of the heart, for in this way only can we learn what we honestly are." (8:28-30). This will be preceded by the following from the prophet Jeremiah: "Let us search and try our ways, and turn again to the Lord." (Lamentations 3:40).
